

### THE 'CRUCIAL FACTS REPORT & DIRECTORY'

- Produced by the User with just one click.
- Produced as a PDF for easy sending/sharing as required.
- All uploaded documents identified – whole system is encrypted to AES256 level (highest).

### Unlike any other information management system

Designed to answer the inevitable family question:

*"If you got hit by a bus, how would I know how everything in our lives fits together? Seriously, how would I know?"*

It is the report that makes *Now Sorted* so different from apps that merely provide storage.

This report *integrates* every piece of data with its relevant document to show how everything important to a Family fits together.

Essential in an emergency ... and especially *an estate plan*.

There is **no limit** to the number of members or related entities (trusts, etc) in a User's 'Family Vault' – each covered within this **easy-to-read** report.

Average time to update information = **three minutes** a month.

In the interests of **total security**, live feeds are completely avoided as they are possible pathways for hackers to exploit – we won't use them
